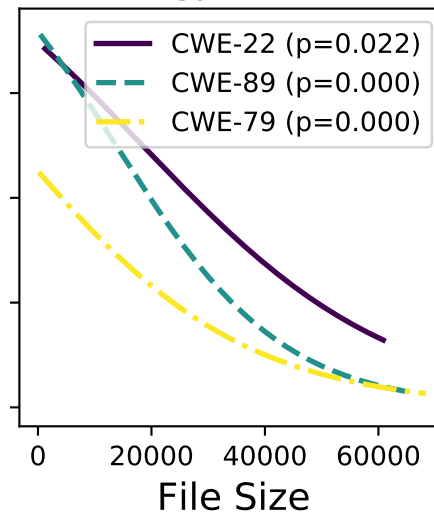

Figure 1: Number of bugs found by CWE-22, CWE-89, and CWE-79 across different bug positions. The graph shows that CWE-22 and CWE-89 find more bugs at lower positions, while CWE-79 finds more bugs at higher positions. The x-axis represents the Bug Position (0 to 6000), and the y-axis represents the number of bugs found (0 to 1000).

Bug Position	CWE-22 (p=0.002)	CWE-89 (p=0.000)	CWE-79 (p=0.000)
0	~900	~800	~500
1000	~500	~500	~200
2000	~300	~400	~100
3000	~150	~300	~50
4000	~100	~200	~30
5000	~80	~150	~20
6000	~70	~100	~10

The graph displays the number of bugs found by three CWE categories across different bug positions. The x-axis represents the Bug Position (0 to 6000), and the y-axis represents the number of bugs found (0 to 100). The legend indicates the following data series:

- CWE-22 ($p=0.004$): Solid purple line.
- CWE-89 ($p=0.002$): Dashed teal line.
- CWE-79 ($p=0.000$): Dash-dot yellow line.

All three categories show a decreasing trend in the number of bugs found as the bug position increases. CWE-79 consistently finds the most bugs, followed by CWE-89, and then CWE-22.

Figure 10: Bugs found by CWE-22, CWE-89, and CWE-79. The graph plots the number of bugs (Y-axis) against Bug Position (X-axis, 0 to 6000). Three series are shown: CWE-22 (p=0.023, solid purple line), CWE-89 (p=0.000, dashed teal line), and CWE-79 (p=0.000, dash-dot yellow line). All three series show a decreasing trend as the bug position increases, with CWE-89 consistently finding the most bugs and CWE-79 finding the fewest.

Legend:

- CWE-22 ($p=0.012$)
- CWE-89 ($p=0.000$)
- CWE-79 ($p=0.000$)

Figure 10: Number of bugs found by CWE-22, CWE-89, and CWE-79 across different bug positions. The graph shows that CWE-22 consistently finds the most bugs, followed by CWE-89, and then CWE-79. The number of bugs found decreases as the bug position increases.

Bug Position	CWE-22 ($p=0.015$)	CWE-89 ($p=0.000$)	CWE-79 ($p=0.000$)
0	~10	~10	~5
2000	~8	~6	~4
4000	~6	~4	~3
6000	~4	~3	~2
8000	~3	~2	~2
